Manasi Patil

Mumbai, Maharashtra, India | manasipatil232005@gmail.com
Portfolio | LinkedIn | GitHub | LeetCode

SUMMARY

Computer Engineering undergraduate (CGPA 9.33/10, Honours in Data Science & Analytics) with experience translating business problems into data-driven, automation and AI solutions. Skilled in gathering business requirements, analysing processes, identifying inefficiencies and presenting actionable recommendations to technical and non-technical stakeholders. Proficient in SQL, Excel, Python, Power BI and REST APIs, with hands-on experience in workflow automation and technology-driven applications.

EDUCATION

K J Somaiya College of Engineering, Mumbai 2023 – 2027
B.Tech in Computer Engineering — CGPA 9.33/10 | Honours in Data Science & Analytics — CGPA 10/10

EXPERIENCE

Business Analyst Intern — Sadekar Enviro, Thane Apr 2025 – Jun 2025
- Gathered and documented requirements from cross-functional stakeholders, translating business questions into structured analytical and reporting requirements.
- Analysed operational datasets using Python, SQL and Excel to identify process inefficiencies and presented actionable improvement recommendations to senior management.
- Identified manual reporting bottlenecks and automated recurring reports and visualisations, improving reporting consistency and operational visibility for stakeholders.

ML Research Intern — K J Somaiya College of Engineering × Universiti Teknologi Malaysia Dec 2025 – Aug 2026
- Automated satellite-data processing workflows using Python, replacing repetitive manual image-level processing with a reproducible pipeline.
- Developed a malaria risk prediction model achieving 90%+ accuracy and generated geospatial heatmaps to communicate high-risk zones for public-health decision-making.
- Benchmarked machine-learning models using performance metrics and presented research findings to academic stakeholders across two institutions.

PROJECTS

Sales Data Warehouse & Analytics — SQL Server | GitHub 2026
SQL Server, T-SQL, ETL, Data Modelling, Git
- Integrated CRM and ERP source data into an analytics-ready warehouse using SQL ETL pipelines for data ingestion, cleansing and standardisation, structured around a star schema.
- Analysed 27K+ orders worth $29M using SQL window functions and CTEs, identifying that 9% of customers contributed 37% of revenue, supporting customer segmentation and retention analysis.
- Developed customer and product reporting views to support business analysis, customer segmentation and data-driven decision-making.

Campus Connect — AI-Powered Placement Workflow Platform 2026
React, FastAPI, REST APIs, MongoDB, Scikit-learn, LLMs
- Digitised manual placement shortlisting through an automated resume-scoring and eligibility-filtering engine, standardising candidate evaluation across four stakeholder roles.
- Designed KPI dashboards and a Placement Health Score to provide placement teams with visibility into funnel performance and reduce manual tracking.
- Developed REST APIs using FastAPI to connect application components with machine-learning models, delivering role-based insights and structured data exchange.

SKILLS

Business Analysis	Requirement Gathering & Documentation, Process Analysis, Business Reporting, KPI Dashboards, Stakeholder Communication
Data & Analytics	SQL (Joins, CTEs, Window Functions), Advanced Excel, Power BI, Python (Pandas, NumPy), Data Visualisation
Technology & Integration	REST APIs, FastAPI, API Testing (Postman), MySQL, PostgreSQL, SQL Server, MongoDB
Automation & AI	ETL Pipelines, Workflow Automation, Data Modelling, Machine Learning (Scikit-learn), LLMs, AWS
Tools	Git, Jupyter Notebook

CERTIFICATIONS

- Deloitte Data Analytics Job Simulation — Forage (June 2025)
- Databases and SQL for Data Science with Python — IBM
- Google AI Essentials — Google
