Manasi Patil

Thane, Maharashtra, India | manasipatil232005@gmail.com
LinkedIn | GitHub | LeetCode

Summary

Computer Engineering undergraduate (CGPA 9.33/10) focused on data engineering and analytics, with hands-on experience building a SQL Server data warehouse, Python data pipelines for ML research, and analytics services. Skilled in Python, SQL, and Power BI. Seeking a 6-month internship and full-time roles from July 2027.

Education

K J Somaiya College of Engineering — Mumbai, India
B.Tech in Computer Engineering | CGPA: 9.33/10 — *2023 – 2027*
Honours in Data Science & Analytics
K J Somaiya College of Engineering | CGPA: 10/10

Technical Skills

Languages & Databases: Python, SQL (MySQL, PostgreSQL, SQL Server), MongoDB
Data & Analytics: Pandas, NumPy, Matplotlib, Seaborn, Power BI, Advanced Excel, EDA, Statistical Analysis, ETL, Data Warehousing
AI/ML: Scikit-learn, PyTorch, TensorFlow, Deep Learning, Computer Vision, NLP, LLMs, LangChain, Hugging Face
Backend & Cloud: FastAPI, Node.js, Express.js, React.js, REST APIs, Docker, AWS (EC2, S3), Git
Cybersecurity: Security Frameworks (NIST), Risk & Vulnerability Assessment, Network Security, Linux, SIEM & Incident Response, Python for Security Automation

Experience

Machine Learning Research Intern — Dec 2025 – Aug 2026
K J Somaiya College of Engineering (with Universiti Teknologi Malaysia) — *Remote*
- Built a reproducible Python pipeline to automate band extraction and NDWI water-index computation from multi-band TIFF satellite data, replacing manual per-image processing.
- Benchmarked four segmentation models (DeepLabV3+, MobileNetV2-CBAM, ResNet-50, VGG19) on multi-spectral imagery, selecting the best by IoU and F1 and presenting findings at two institutions.
- Developed a malaria risk prediction model with over 90% accuracy using geospatial feature engineering, delivering heatmaps of high-risk zones for public health decisions.

Business Analyst Intern — Apr 2025 – Jun 2025
Sadekar Enviro — *Thane, India*
- Analyzed operational and environmental datasets in Python, SQL, and Excel to identify process inefficiencies and presented actionable insights to senior management.
- Gathered requirements from cross-functional teams and automated recurring reports and visualizations, replacing manual data compilation.

Projects

SQL Data Warehouse — Medallion Architecture | *SQL Server, T-SQL, ETL, Data Modeling, Git* — 2026
- Designed and built an end-to-end data warehouse on a three-layer architecture (Bronze, Silver, Gold), consolidating CRM and ERP source data into one analytics-ready model.
- Developed SQL ETL pipelines using stored procedures for data ingestion, cleansing, standardization, and transformation between layers.
- Modeled the Gold layer as a star schema (customer and product dimensions, sales fact table) for business reporting, with a data catalog and data-flow documentation, version-controlled in Git.

Campus Connect — AI-Powered Placement Analytics Platform | *React, FastAPI, MongoDB, LLM* — 2026
- Designed KPI dashboards and a Placement Health Score prediction model (Scikit-learn) giving placement teams real-time visibility into funnel performance, reducing manual tracking effort.
- Built an ML-driven ATS resume-scoring engine and automated eligibility filtering system, cutting manual shortlisting time and standardizing candidate evaluation across four stakeholder roles.
- Developed a Python/FastAPI analytics service layer exposing role-based insights via JWT-secured REST APIs, applying EDA and model evaluation (F1, AUC) to iteratively improve prediction accuracy.

Certifications & Achievements

- Databases and SQL for Data Science with Python — IBM
- Google Cybersecurity Professional Certificate (in progress)
- Google AI Essentials Certificate
- Deloitte Data Analytics Job Simulation — Forage (June 2025)
